

ELECTRIC PNEUMATIC TIRE FORKLIFT

9,000-12,000 LB CAPACITY

THE HEAVY-DUTY ELECTRIC TRUCK

HAVE BIGGER EXPECTATIONS

AND EXPERIENCE REAL PRODUCTIVITY

Experience levels of performance able to compete with IC engine forklifts while taking full advantages of the benefits electric forklifts bring to the table: quiet operation, intelligent performance systems, zero emissions and lower total cost of ownership.

These trucks are designed to operate in the toughest applications. Common industries include:

- Transportation equipment
- Wholesale trade - durable goods
- Paper and allied products
- Textile mill products
- Fabricated metal products
- Stone, clay and glass
- Food and kindred products

An Investment To Count On

Designed for durability and reliability, the robust construction of these units can help to reduce repair and replacement needs and can increase the residual market value of the truck. Simple plug-in diagnostics, easy access to major components and the easy-to-use multifunction display help to reduce downtime and maintain efficient performance.

Performance On Demand

The powerful and responsive AC drive system provides performance levels offering a zero emissions alternative to traditional IC customers that have high expectations when it comes to productivity. Various integrated systems allow for intelligent control and adjustment in a wide array of operating environments.

Comfort And Safety

The comfortable, quiet and heavily-equipped operator compartment allows for precise (and low effort) control to provide confident, stress-free and enjoyable operation.

Comfort

This truck has been created with features and benefits in mind to help keep the operator refreshed and revitalized during a long shift.

Standard Features	Standard	Optional
80V AC Drive System	●	
Preset ECO and PRO performance modes	●	
Side battery extraction	●	
Multifunction, interactive, full-color display	●	
Cornering speed control	●	
Standard wet disc brakes	●	
TruckTool diagnostics	●	
Integrated Presence System (IPS)	●	
Full-suspension vinyl Grammar MSG65 Seat	●	
Integrated LED worklights	●	
Manual hydraulic levers	●	
Common Options	Standard	Optional
Alternative hydraulic controls (dual joysticks)		●
Fingertip control armrest		●
Battery extraction options		●
Additional lights and awareness options		●
PIN code access		●
Automatic tilt centering		●
Panel cabins		●
Side shifters		●
Fork positioners		●
Multiple tire options		●

Ask your local dealer about the available options for improved performance, productivity and operator comfort.

TACKLE YOUR TOUGHEST JOBS.

EFFICIENTLY AND WITH EASE.

Maneuverability and Control Systems

- **All-wheel steering** offers good grip, smooth turning and extremely agile steering aided by the +100 degree rear steer axle that enables side turns with minimal rear movement.
- **The Sensitive Drive System** is designed for rapid adaptation of performance in reaction to the commands of the operator, ensuring smooth starts, stops and hydraulic activity.
- **Front wheels** can be locked automatically at small steering angles or manually via an optional pedal function to increase traction on slippery surfaces.
- **Hill hold** engages the brake system when the accelerator is released on a grade to hold the truck in place and not allow for unintended rolling down a ramp with a load.
- **Reactionary hydraulic system** proactively adjusts to the load weight for smooth and precise control of the mast and forks.
- **Load control** is increased with automatic hydraulic control tuning when lifting over certain heights and passive sway control allows for stress on the mast to be absorbed by the chassis.

Performance

- 80V AC drive system delivers performance comparable to the internal combustion powered units but also includes the efficiency and total cost of ownership savings that come with our electric product line-up.
- The AC drive system automatically provides additional torque and acceleration when the operator needs it, even when carrying large loads.
- Standard wet disc brakes require less maintenance and allow for regenerative braking, sending energy back to the battery.
- Standard pre-set ECO and PRO modes allow the truck to be set at the level that is required by the application, but also the level necessitated by the experience of the operator.

Ergonomics and Safety

- Integrated Presence System (IPS) includes lockout of both hydraulic and travel functions if the operator is not in the normal operating position in the seat.
- Quiet drive units keep the driver comfortable and can help increase awareness of surrounding areas.
- Spacious operator compartment is rubber-mounted to further minimize noise and vibration during operation.
- Easy and smooth entry/exit to/from the operator compartment.
- Emphasis on storage space for tools, mobile devices, bottles and other personal items make the truck a comfortable office space for operators.
- For low-light conditions, standard light-packages are included which provide forward and reverse LED lights for increased visibility.

NOTE: These specifications assume the use of drive axles, tires and tilt angles specified. Maximum converted value to gradeability at maximum torque of the traction motor. Any modification to specifications, or any other combination of specifications made after the shipment of the truck, requires prior written approval from Logisnext Americas Inc. (See ANSI/ITSDF B56.1.) Also be advised that overall operating visibility may be affected by the mast configuration and mast options of your truck. Therefore, you may need to add ancillary [auxiliary] devices or modify your operating practices. Consult your dealer for further information.

SAFETY STANDARDS

These trucks meet American National Standards Institute/Industrial Truck Standards Development Foundation, ANSI/ITSDF B56.1. UL-Classified by Underwriters Laboratories, Inc., as to fire and electric shock hazard only; Type E, EE (optional), Industrial Trucks. Users should be aware of, and adhere to, applicable codes and regulations regarding operator training, use, operation and maintenance of powered industrial trucks, including:

- ANSI/ITSDF B56.1.
- NFPA 505, fire safety standard for powered industrial trucks -type designations, areas of use, maintenance and operation.
- Occupational Safety and Health Administration (OSHA) regulations that may apply.

Specifications, equipment, technical data, photos and illustrations based on information at time of printing and subject to change without notice. Some products may be shown with optional equipment.

Note: Equipping this model (these models) with a power source (e.g. Lithium-ion, Hydrogen Fuel cell, etc.) that has not been previously approved by the factory is considered a modification. Per OSHA 1910.178 and ANSI/ITSDF B56.1, please consult with your factory representative prior to installing any non-OEM power source that has not been previously approved.

8,000-12,000 LB CAPACITY ELECTRIC PNEUMATIC TIRE FORKLIFT

Delivering Exceptional Value

More Than 296,000 Parts To Keep You Running

Mitsubishi Forklift Trucks offers several parts programs, all designed to bring you top performance and convenience for your material handling needs. Contact your local dealer to put our services to work for you.

Support To Fit Your Operation

Find out why more companies are relying on Mitsubishi forklift truck dealers to keep their fleet operating at top performance. Our efficiency provides customers with a better return on investment, and qualified service technicians, diverse parts inventory and unparalleled selection of service options can help reduce your total cost of ownership.

Extensive Dealer Network

The Mitsubishi forklift truck dealer network is dedicated to finding the right forklift solution for your business. With more than 300 dealer locations, you can rely on your local dealer to provide the service you need when you need it most.

Manufactured with superior quality and exceptional value, Mitsubishi forklift trucks are supported by an extensive dealer and field support network located throughout North and South America. Don't forget to ask your local Mitsubishi forklift truck dealer about details on factory retail programs, financing plans and additional options and dealer services like planned maintenance and operator training.
