

BXCN3 Series

Electric Counterbalanced Forklifts

36 & 48 Volt AC-Powered
3,000 - 4,000 lbs. Capacities | Cushion Tire

BXCN3 Series Applications

Greater performance, higher capacity and advanced features make the BXCN3 Series *the* choice for demanding applications, including:

- Manufacturing • Warehousing
- Distribution • Bottling

Look for these symbols for features available only on UniCarriers forklifts or that provide a proven performance advantage as compared to competitive trucks.

NEVER QUIT.

It defines our forklifts and the company that builds them.

Over the course of a century, the company known as UniCarriers took shape. As we grew and evolved into a US manufacturer with a global reach in nearly 100 countries worldwide, much has changed, but one thing hasn't: our mission. UniCarriers is committed to providing you with the ultimate in reliability, performance, and value.

And that commitment can be seen in the BXCN3 Series, a versatile lift truck that combines exceptional power efficiency with an advanced feature package that includes self-contained onboard diagnostics and mast interlock. Plus, it's backed by the best standard, unlimited warranty in the business. Add UniCarriers legendary reliability, ease-of-maintenance and preset performance modes — and you have the right forklift to move your products, and your business, forward.

Up Your UpTime

Discover reliability features that cut downtime and keep your business up and running

Comfort Zone

Your drivers and your entire operation will benefit from our comfort & productivity features

Power & Performance

100% AC motors and controllers are only the beginning of our performance advantages

Sweet Savings

The BXCN3 is designed to deliver you a low cost of ownership year after year

Play It Safe

Safety is everybody's business, and the BXCN3 is all business when it comes to safety

Control Freak

With the BXCN3, you're in complete control when it comes to managing costs and productivity

Make It Yours

Already well appointed, the BXCN3 can be customized to meet your specific needs

To learn more, and a find a dealer near you, visit LogisnextAmericas.com/UniCarriers

Up Your UpTime

Stay Cool

Built-in thermal sensors help protect the motor and controller systems, promoting more **reliable performance**. A warning will flash on the LCD screen to advise the operator if overheating has occurred, followed by reduced travel and lift operations. Information is automatically locked into the truck's service history to assist the technician and speed servicing.

Reliable AC Technology

The BXCN3 Series is powered by our 100% AC motor and hydraulics systems. With **better cooling capacity and greater reliability** even in humid environments, AC power delivers more consistent and higher performance throughout the shift on a single battery charge for more uptime and greater productivity.

Lithium-Ion Batteries

Smart power solutions designed to communicate directly with the truck for increased efficiency and results. Maintenance free which reduces total cost of ownership and downtime from traditional lead-acid batteries.

Li-Ion batteries are covered by a 6-year, 3,600 cycles with 75% residual capacity guarantee.

Benefits of Moving to Lithium-Ion Technology

- Fast charging throughout the course of the shift during breaks allows the truck to stay charged when customers need it.
- Li-Ion Batteries are smart power solutions designed to communicate directly with the truck resulting in increased efficiency and output.
- The Li-Ion solution is completely maintenance free, which can help reduce overall cost of ownership and the downtime associated with maintaining and caring for traditional lead acid batteries.
- Battery life expectancy of up to 3,000 full cycles (vs. 900 to 1,200 cycles in lead-acid batteries).
- No gas is produced during charging and no acid is contained in the battery as compared with conventional lead-acid batteries..

Dependable Drive Unit

Our brushless AC induction drive motor has **fewer parts to maintain** and is perfectly matched to a simple, yet highly efficient, transmission. The result? Greater dependability and higher performance.

Advanced Control System

One-touch and customizable programming are available through the full color display. A wide range of indicators and service maintenance reminders reduce troubleshooting time, so the unit is back in operation faster.

Simplified Battery Maintenance & Replacement

Gas stay assist keeps the **hood open nearly 90 degrees** making routine battery maintenance and change-outs faster. Optional rollout design* further simplifies battery removal.

Comfort Zone

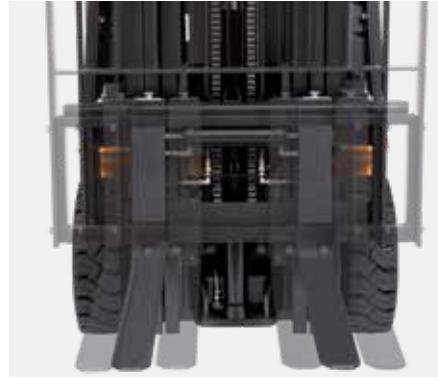

Work comes first, but there are amenities that make the experience more pleasurable. And happy drivers are statistically more productive.

Superior Visibility

A standard high-visibility carriage* and, wide-view mast — together these features produce clear sight-lines for both loading and moving.

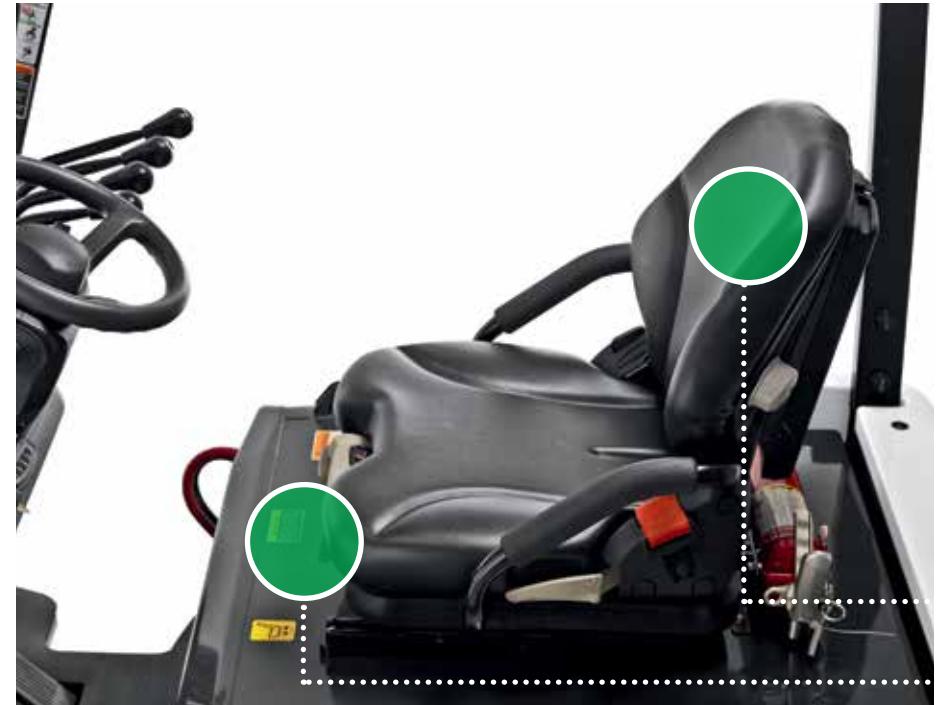

Our Seat Supports Your Driver and Your Productivity

The lumbar support and weight adjustments create customized comfort for the operator, while a non-cinching seatbelt allows a wider range of movement. The full suspension design absorbs shocks for a smoother, more comfortable ride — and it's all standard on BXCN3 Series forklifts.

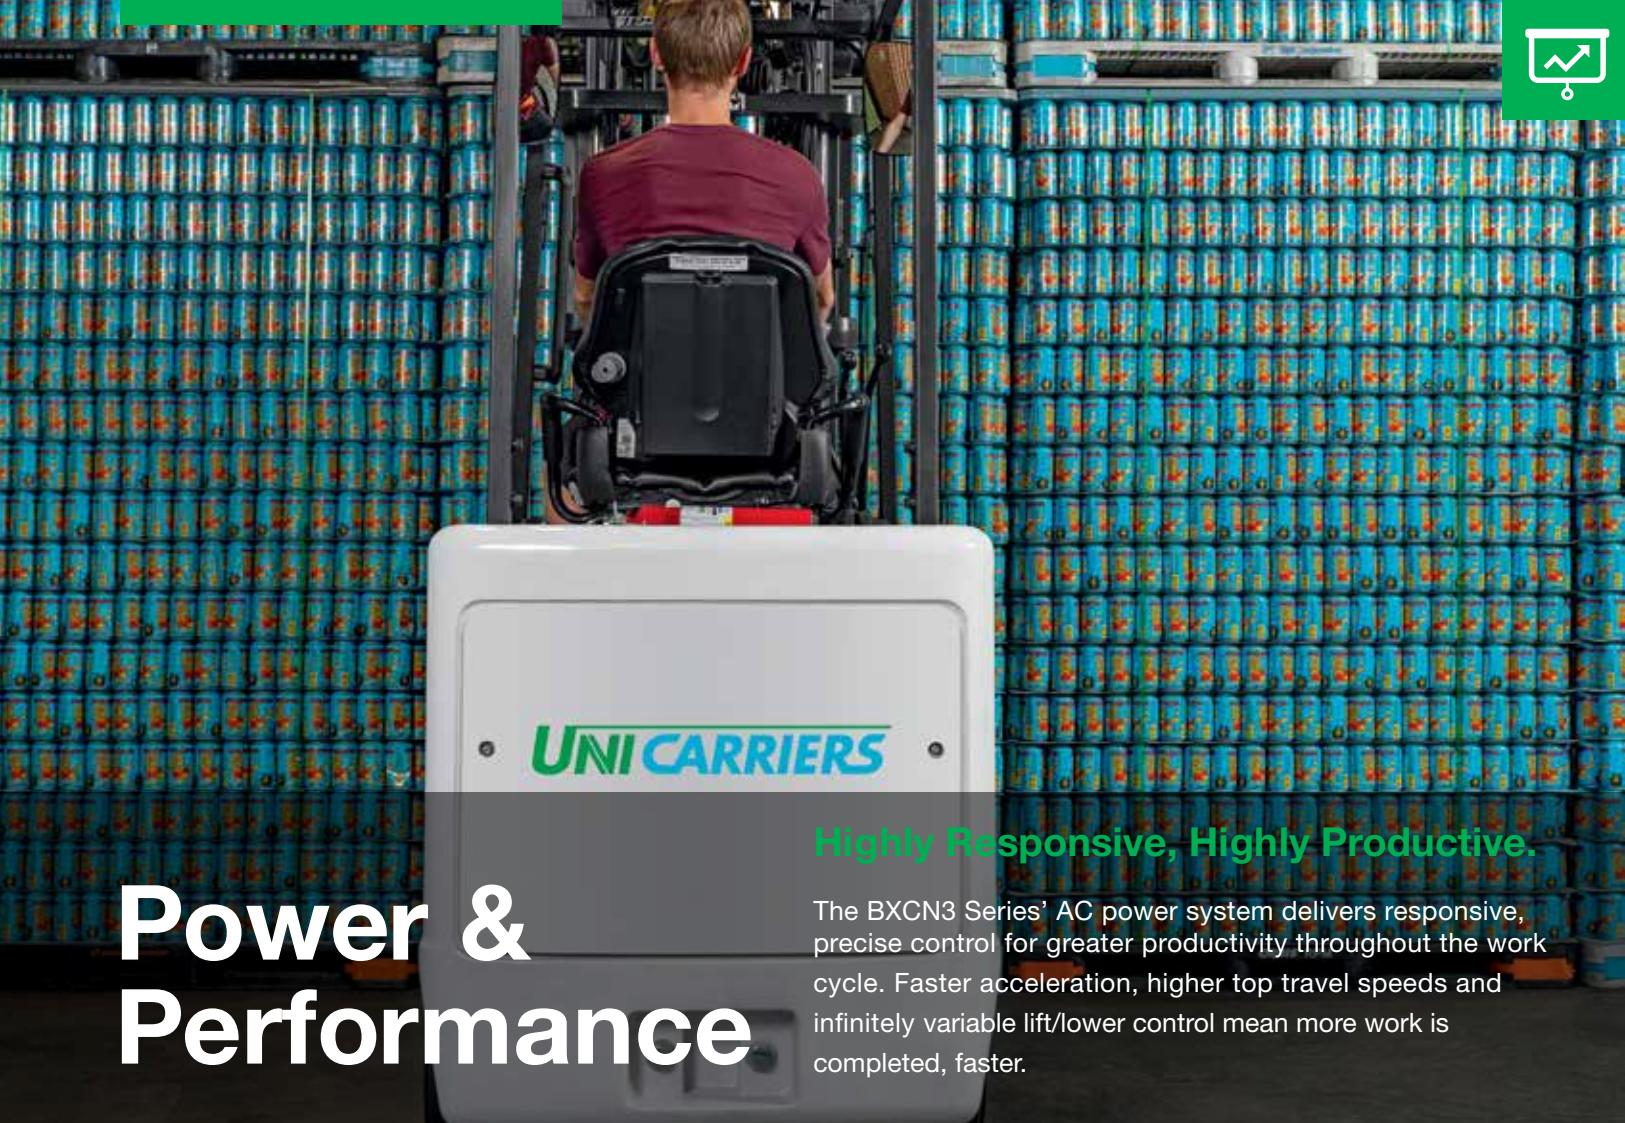

Vinyl seats come standard, with cloth and non-suspension seats available as options.

Lumbar support adjustment

Weight adjustment

*Only available with quad mast

Power & Performance

Highly Responsive, Highly Productive.

The BXCN3 Series' AC power system delivers responsive, precise control for greater productivity throughout the work cycle. Faster acceleration, higher top travel speeds and infinitely variable lift/lower control mean more work is completed, faster.

Rugged UniCarriers Designed and Manufactured Mast

Our mast features rolled steel channels and thick inner rails for increased capacity retention. Side thrust rollers on the fork carriage are easily accessed for carriage adjustment.

5 Performance Modes - Find the right mix of Productivity & Efficiency for your application

The BXCN3 Series features adjustable settings to optimize performance based on the application, work environment or operator experience. Choose from the five factory-set modes (shown below) to easily customize your lift truck. The BXCN3 also has the ability to create unique settings, finely tuned for your operator and operation.

	A	B	C	D	E
Lift	Fast	Fast	Medium	Fast	Fast
Tilt	Slow	Slow	Slow	Slow	Slow
Truck Speed	Medium	Fast	Slow	Fast	Medium
Acceleration	Medium	Fast	Medium	Medium	Fast
Power	Standard	Powerful	Economy	Standard	Powerful
Regeneration	Medium	Medium	Medium	Medium	Medium

Fast Acceleration, Travel and Lift Speeds

Use the high performance setting to reach top speeds and optimize productivity. Technicians can program the truck's response time for even quicker acceleration.

Travel Speeds
11.3 / 11.3 MPH
Full load / No load

Lift Speeds
98.4 / 129.9 FPM
Full load / No load

Gradeability
25 %
Full load

*Based on 48 volt 3000 lb capacity cushion tire model

Sweet Savings

Longer Service Intervals means lower maintenance costs

With industry-leading 500-hour service intervals, you can extend the amount of time before your next expense.

UNI CARRIERS

Save Precious Battery Power

Industrial batteries can be a significant part of your operational expenses. The BXCN3 incorporates power saving features to optimize battery usage so you can get the most out of your investment.

Advanced regenerative technology **reclaims power** from four different operations, lowering power consumption and **reducing component wear** through less heat generation — to keep your equipment **operating longer**, with less time in the charging bay.

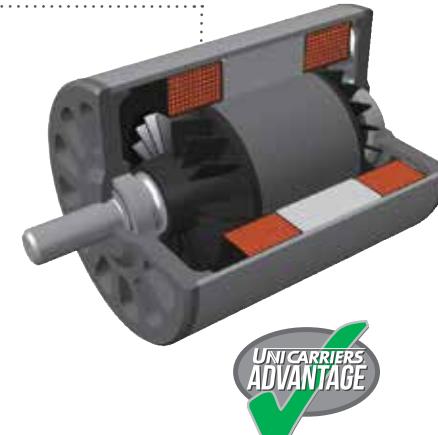

An auto power-off cuts the electrical system if the forklift sits idle.

On-demand power steering system draws battery power only when required.

- 1** Switchback regeneration
- 2** Foot brake regeneration
- 3** Accelerator-off regeneration
- 4** Controlled rollback regeneration

Fewer Motors to Maintain

The 100% AC-powered system on the BXCN3 features brushless drive and pump motors and a single contactor. The **steering system is electronically controlled and powered through the hydraulics**, thus eliminating the need for — and added expense of — a separate steering motor.

Efficient 2-Stage Hydraulics

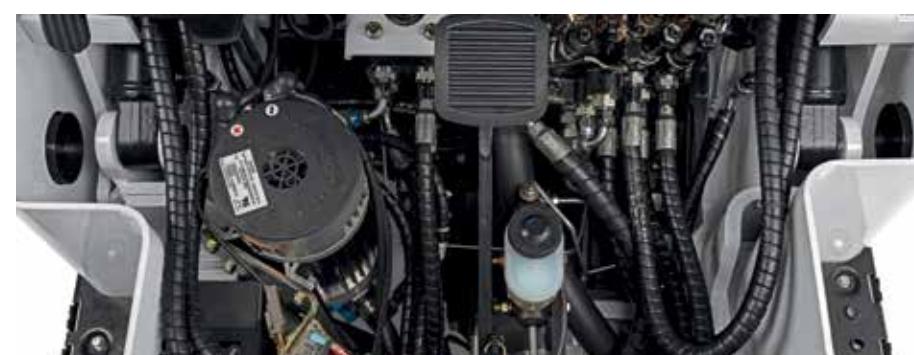

When operators move the hydraulic levers shorter distances, the hydraulic motor runs at a low speed to conserve energy while still providing sufficient flow for precise movements.

Remove rear panel for access to the controller for inspection and planned maintenance.

Minimize Preventable Repairs

Operators are more likely to perform regular lift truck inspections if they are easy to do. Access to hydraulic and brake fluids is convenient, making daily checks or required refills simple, so operators can focus on the job ahead.

Simple floorboard removal (tool-free) provides quick access to components for easy visual checks and maintenance work. Two-piece diamond tread floorboard includes door to access brake fluid for visual level inspection and refills.

Display-based indicators notify operators when maintenance is required, helping to reduce the risk of higher costs due to delayed servicing.

Play It Safe

Forward Thinking Back Up Alarm

For applications with varying noise levels, there is an optional self-adjusting alarm that adjusts sound volume based on ambient noise levels.

Reverse driving actuates optional blue spotlight to illuminate the floor, for advanced visual warning.

Optional UL 'ES' or EE Ratings are available on all BXCN3 models, offering extra safeguards to the electrical system.

Safety Doesn't Have to be Complicated

Combining an elongated 15-inch grab handle with oversized anti-slip grill plate and hip restraint provides three point access that is hard to miss.

Operator Presence System

This comprehensive system includes a **seat-actuated power interrupt with mast-lock**, automatically preventing lift and tilt operations if the operator leaves the seat. The **return-to-neutral** feature minimizes forklift movement if the operator leaves the truck while still in gear. Other audible and visual warnings come standard, including parking **brake warning** and **seatbelt alarm**.

Seeing is Believing

Cylinders are positioned behind the mast rails resulting in fewer visual obstructions for the operator. Narrow mast channels and OHG slats take visibility to the next level

Password Protected Security

Using a PIN code/password entry feature helps assure that **only authorized drivers are operating your BXCN3**. Up to five unique performance settings can be created, based on application and/or individual operator skill level.

Control Freak

Maintain Control

When operating on inclines, our **Controlled Rollback** feature uses regenerative braking to automatically maintain a slow, consistent speed on a ramp or incline when the accelerator pedal is released. This eliminates the need for continuous brake pedal force by the operator.

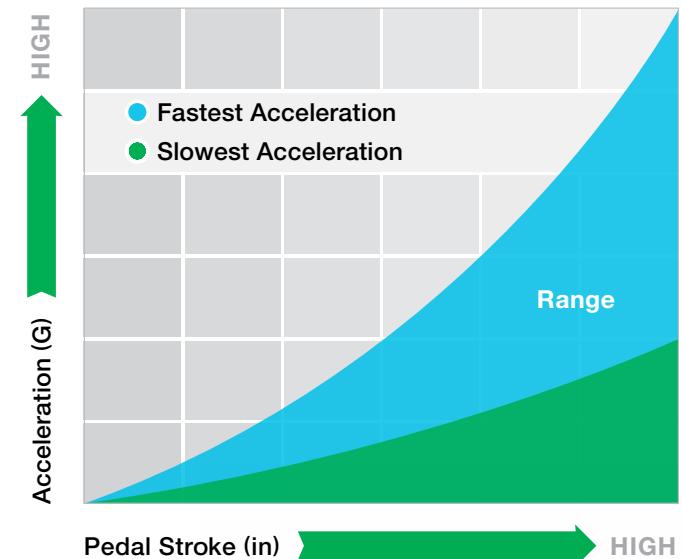

The Ultimate in Control

The interactive 4" full color display on the BXCN3 provides operators and technicians with a wealth of information through its warnings and readouts. With 5 different preprogrammed performance modes and 3 different screen backgrounds to choose from, your operator can customize their driving experience.

Automotive-Style Parking Brake with Warning

As part of the Operator Presence System, a warning buzzer alerts the driver if he leaves the seat without first setting the brake. Conveniently located, the foot-activated design makes it easy for the operator to quickly depress the pedal to apply the brake. A display indicates when the brake is engaged. Includes a simple hand release.

Sensitive to Your Acceleration Needs

With our electronic control system, the quicker the accelerator pedal is depressed, the faster our BXCN3 Series will respond to your command for speed. This feature is ideal for fast paced operations and where long runs are common. Operators can also maintain a slower acceleration rate by reducing their pedal force when pedestrians are present or in more confined areas of the warehouse. In addition, the operator can adjust the acceleration rate through the meter panel, for even faster or slower response.

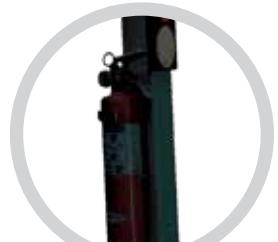

Make it Yours

Choose from a variety of options to customize your ride. If you don't see what you need, contact your authorized UniCarriers dealer for help.

UNICARRIERS
FORKLIFT

• Strobe Light

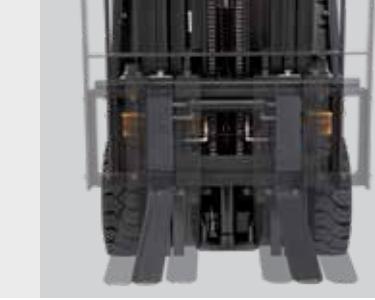

• Clamp Release Switch

• Fire Extinguisher

Overhead Guard Options
Lowered height and drive-in rack overhead guard options can be selected to suit your application

Sideshifting Fork Positioner
Hydraulic fork adjustment prevents operator strain by eliminating the need to manually move forks. Available with quad masts only.

Foot Directional Control
For hands-free forward and reverse travel control. Ideal for rapid shuttle applications.

Blue Spot Light
Available in forward and/or reverse options, these can help pedestrians stay aware that forklifts are operating nearby.

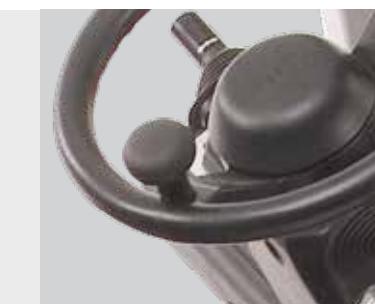

High Visibility Seatbelt
Bright orange seatbelt provides instant visual confirmation that operators are using this safety equipment.

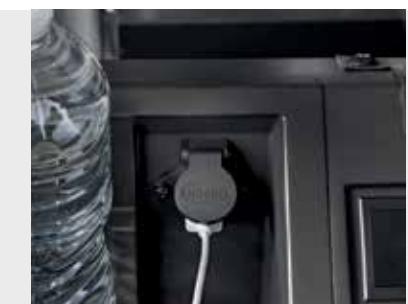

Electronic Backup Smart Alarm
Provides notice to pedestrians and other drivers in the area. For applications with varying noise levels, there is an optional self-adjusting alarm that adjusts sound volume based on ambient noise levels.

Freezer Package
Provides protection in cold storage or freezer environments in temperatures as low as -31°F (-35°C). Package includes special hydraulic oil and steel tubing, rubber floor mat and tilt cylinder boots.

Steering Wheel Spinner Knob
Provides easier operator control and handling.

USB Charge Port
Easy access charging for phones or accessories

BXCN3 models comply to UL583 Type ES, with optional Type EE compliance. Consult Factory for details.

SAFETY STANDARDS

These trucks meet American National Standards Institute/Industrial Truck Standards Development Foundation, ANSI/ITSDF B56.1. UL-Classified by Underwriters Laboratories, Inc., as to fire and electric shock hazard only; Type E, EE (optional), Industrial Trucks. Users should be aware of, and adhere to, applicable codes and regulations regarding operator training, use, operation and maintenance of powered industrial trucks, including:

- ANSI/ITSDF B56.1.
- NFPA 505, fire safety standard for powered industrial trucks -type designations, areas of use, maintenance and operation.
- Occupational Safety and Health Administration (OSHA) regulations that may apply.

Specifications, equipment, technical data, photos and illustrations based on information at time of printing and subject to change without notice. Some products may be shown with optional equipment.

Note: Equipping this model (these models) with a power source (e.g. Lithium-ion, Hydrogen Fuel cell, etc.) that has not been previously approved by the factory is considered a modification. Per OSHA 1910.178 and ANSI/ITSDF B56.1, please consult with your factory representative prior to installing any non-OEM power source that has not been previously approved.

Reliability.

It's the defining trait of our company and our forklifts.

UniCarriers' roots extend back over 100 years, and over that time, strong, reliable performance has always been the hallmark of our organization, our people and our equipment.

Today, our unrivaled reliability continues to provide UniCarriers' customers with a competitive edge. And together, we move the merchandise that moves world commerce with greater efficiency, economy and reliability.

When it comes to providing forklifts that make a difference for our customers and theirs...

We Never Quit.
